

## Zagora Shpk - Koplik (Sage)

42.2855684 N,19.480775 E

42.2914452, 19.4803584

Sherbela is a permanent, indigenous plant of this area, found in rocky areas, in the area of the Shrubs shrubs. The plant is found grown spontaneously and blooms from May to July. Sherbela is widely used in the pharmaceutical, food, cosmetic and tea industries. Zagora Shpk is a company for the collection of medicinal herbs, especially sage, which is grown mainly in the Koplik area.
