

MUSEO DELTA ANTICO

Comacchio - Via Agatopisto 2/a
44.6925456, 12.1811521

A project carried out in collaboration with the University of Ferrara, Master of The Second Level in Science and Cosmetic Technology: COSMAST and Museum System of the University of Ferrara. The smell is the most spiritual of all senses. It is precisely this spiritual characteristic that allows the scent to witness an impression of presence in empty spaces. In addition, the use of perfumes sheds light on the most complex aspects of society, such as trade, scientific knowledge, ritual habits, luxury, interpersonal relationships and communication between people. The ideas offered by the path of essences created for the Ancient Delta Museum, are an opportunity to talk, with another language, of the history and people lived in past centuries. The olfactory path of the Delta Antico Museum is enriched today by two new fragrances that are added to the three already present in the museum, for it created specifically.
