

Via delle Volte

Via delle Volte

44.8311629, 11.6213413

In the Street of the Vaults the development in depth was solved architecturally with the creation of aerial passages, the current faces dotting the road, used to connect the warehouses on the river bank to the shops-dwellings towards the center. It is advisable to walk a good section of the road to enjoy the vision of 13th-century and fifteenth-century buildings, as well as the charm of the narrow streets that depart from them.
