

# Natural History Center of Serbia - Svilajnac

Kralja Petra I 111, 35210 Svilajnac, Serbia

44.1989521, 21.246693

Natural History Center of Serbia in Svilajnac represents a blend of science, education, entertainment and tourism in one place, in a very specific way. Such a concept makes it unique in this part of Europe. The goal is that the center becomes the scientific core of the region that will bring together scientists and researchers from the country and the world who would through various activities, exchange the knowledge and their experience and come up with new scientific discoveries and results in the field of natural sciences. Also, with its attractiveness and popularity of world proportions, it is becoming the center of entertainment and one of the most visited tourist destinations in Serbia. Its attractiveness lies in the unity of the large exhibition space and entertainment dino-park in the open. Experts from the Natural History Museum in Belgrade, the Faculty of Mining and Geology of the University of Belgrade and the curators of the Natural Science Center of Serbia in Svilajnac participated in the development of all the items. There are nine thematic exhibitions in the museum part of the center: geological time machine, world of minerals and rocks, dinosaur world, celestial stones, biodiversity of Serbia, ice age witnesses, Djerdap bio-archeology (guest), geodiversity of Serbia and a volcano that is outside the museum and you cannot miss it. The largest part of the park is the setting of the dinosaurs in their living forms and in their real environment.
