Pamvotida Lake

39.66074675, 20.8933645674174

Pamvotis Lake is one of the oldest lakes worldwide and the second oldest at European level, following Lake Ohrid (aged approximately about 7 million years). It is a sensitive ecosystem, which belongs to the European network of protected areas, NATURA 2000, because of the important habitats and the rare species of both flora and fauna living in the area.
