

Solkan's bridge

Solkan

45.972742, 13.649443

The Solkan Bridge is a famous detached bridge over the Soca River in Solkan on the Bohinj Railway Jesenice - Nova Gorica. The bridge has the longest stone arch in the world and the longest stone arch between railway bridges. The main arch used 4,533 precision machined rock shell stones from the quarry near Nabrežina.
