Pag

44.4966129, 14.946185318960357

For centuries, the production of grapes and wine has been an important industry and a vital aspect of development on the island of Pag. White wine made from several grape varieties has been produced on the island since ancient times, and was named “The Žutica of Pag” because of its deep yellow colour. The main variety for wine production has been Gegić, the island’s leading variety.
