

Vransko Jezero

Vransko jezero

43.8948673, 15.572744474933575

Vransko Lake has cultural and historical monuments date from as far back as 2000 years B.C. Vransko Lake Nature Park contains many secrets and is a constant source of scientific discoveries which the park is always exploring with the help of experts dealing with different fields of research. The Lake is one of the few areas in the world where you can simultaneously explore three very different environments and landscapes; the sea coast, the rich archipelago behind it and the Mediterranean swamp with its unique landscape and ecosystem, and just behind the hill, the rural lifestyle of the villages in Ravni kotari.
