

Scuba diving, Skyros

Skyros

38.87304355, 24.524477385184014

The geographical location of Skyros, the coastline, the seabed configuration, the large number of rocky islands surrounding the island, the wrecks, the sea caves, the rocky shores and the steep beaches, are favored and offered for guided tours in the form of Scubadiving. Schools take lessons in Scubadiving, which is a unique experience. Organized and specialized Scubadiving centers in Skyros provide diving training, diving equipment, organized diving excursions by boat. Even if there is diving equipment in advance, transfer to the place desired by the visitor. Scubadiving is permitted in all areas except the area around the airport, the archaeological site of Palamari (north end of the island) and the Three Boukes (naval base).
