Zadar

44.1186078, 15.232136

The Wings for Life World Run is a truly unique and global race for both runners and wheelchair participants. Instead of a finish line, competitors race side by side to keep ahead of the virtual Catcher Car. Now in its eighth year, on May 9, 2021, Wings for Life World Run participants in Croatia can also run together in Zadar. Beautiful road follows the coastline in the city of Zadar. The start is from Punta Bajlo in the east part of the city. The track starts west and after 2.5k turns back to the Gaženica harbor. One lap is around 9.5k long. Meet up with your friends, download the Wings for Life World Run App and join all the other people running until the virtual Catcher Car catches you of course. The race starts at exactly 13:00. The virtual Catcher Car takes off 30 minutes after the start at 14 km/h and steadily increases its speed until the last athletes have been caught. 100% of all donations and the entry fees go directly into spinal cord research projects.
