

Slapovi Kozice

Fojnica

43.9631837, 17.8997641

Although it is best known for its spa and Franciscan monastery built in the 14th century, which preserves more than 50,000 books, including 10,000 centuries old, Fojnica also hides many natural beauties such as Prokoško Lake and Kozice waterfalls. This natural gem is located about 10 kilometers from Fojnica. In the shade of centuries-old forests, three smaller and two larger waterfalls, about 20 meters high, fall into the crystal clear water through a steep cliff of rocks.
