

The excursion site Sisevac

Stubica bb, Parain, Republic of Serbia
43.9560502, 21.5866210944154

At the foot of Kucajske mountains, 360 meters above sea level, there is Sisevac, one of the pearls of our tourism. It is 160 km from Belgrade, and only 20 km from the exclusion from the highway near Ćuprija. Sisevac is located at the source of the Crnica River in a beautiful basin surrounded by forests. The unique wind rose makes this picnic area an air spa. The preserved nature, the green forests of the southern Kucaj, the clear river and the streams that flow in it, the clean air, the thermal water whose temperatures are exactly 36°C, two swimming pools, sports fields, with a rich cultural and historical tradition make this area unique. In Sisevac is the monastery of Saint Sisoje, in the immediate vicinity of the monastery Ravanica and not far from Manasija.
