The Lake Šumarice is located 3km from the city center, within the complex of Kragujevački Oktobar Memorial Park. The lake is rich in fish - anchovy carp, but there are also amur, birch and other species of fish. Except for fishermen, the lake is a true paradise for bathers and visitors who want a good party. The left side of the coast is decorated, with a beach about 800 meters long, a promenade, benches, tables, volleyball courts and a zip line - adventure park. Besides the smell and sounds of nature and adventure, along the beach there are various catering facilities that complement the tourist offer.

Overview

Country: Republic of Serbia
