

Speech of Water

Rekovac, Republic of Serbia

43.8582678, 21.0935298

The speech of the Water is the source on the hill Grad (818m). The curiosity of this source is the fact that water springs from the rock wall from which the bubbles are heard, which rises to the surface several meters below the wall itself. Because of this specific bubble, which comes from the interior of the wall and resembles speech, the water is probably called the Voice of the Water. Many legends have been rolled around this spring water. It is possible to reach this source from several directions, ie from villages of Kalenic, Sibnica and Zupanjavac. To the source located on an inaccessible terrain only by the macadam and the village roads, it is most simple to come from the direction of Kalenic village. From the center of the village to the source leads the macadam road to the hamlet of Krečan (1.5km), and from there the path over the curve extends with a beautiful view of Kalenic and the mountain peak of Čukar. This way you can go to the field by vehicle to the speech water. From the other two directions it is better to ask kind local people who will lead you to the source. More importantly, the mountaineering club Žeželj organises hiking tours on the marked route through the picturesque nature, and a beautiful rest area is set exactly at the spot of the spring. You'll enjoy the experience of nature and refreshment.
